

Special Surface Treatments on the Metal Frames of PIIROINEN Furniture Collection

1.3.2024

Attention to our customers ordering products with special surface treatments:

PIIROINEN does not guarantee that the color of the surfaces of specially coated (*) frames will be uniformly consistent, i.e., homogeneous. The color may vary significantly between different parts of the frame. This is due to the coating method combined with the challenging geometric shapes of the frames.

The durability properties of specially coated frames are equivalent to those of polyester paint. PIIROINEN is responsible for the normal technical quality of the frame's surface treatment but does not accept color variations of the frame as a basis for complaints.

By ordering a product with a special coating, the customer accepts the above-mentioned conditions. Not all furniture in the PIIROINEN collection is available with special coatings. Information about these models is provided on our website (www.piiroinen.com) and by our sales personnel.

(*)

Special surface treatments refer to the following finishes for metal frames:

- Light Copper (Cu 3)
- Dark Copper (Cu 4)
- Brass (Brass 2)
- Bronze (Bronze 2)
