

ARENA SEATING SYSTEMS

PIIROINEN

We create appealing, durable and comfortable arena seating solutions.

Let the audience

SIT, STAND, CHEER & CRY COMFORTABLY

Appealing and durable arena seating solutions

We design and manufacture seating systems tailored to our customers' needs. Our experts can help designers and architects to exceed the expectations of their customers and end users worldwide.

We have expertise in both product development and manufacturing. Our extensive network of partners helps us achieve our goals.

Our services include seating systems installation, quality assurance, maintenance, and renewal of the seats as well as update and modification works.

We aim to create a positive impact on society and minimize our environmental impacts.

Our operations are certified in accordance with the international quality, environmental and health and safety standards.

TELESCOPIC SEATING SYSTEMS

MAXIMUM FLEXIBILITY

Telescopic systems can be firmly anchored to the floor or wall.

In order to achieve maximum flexibility, the telescopes can also be designed so that the stands can be moved with a pallet jacks, air cushions or with forklifts.

SPACES FOR MULTIUSE

Telescopic seating systems are suitable for sports and multi-purpose arenas, as well as auditoriums, where it is desired to modify the seating systems to enable the use of the facilities for different sports and events.

DESIGNED TO LAST

Our telescopic seating systems are designed to withstand daily changes, movement and changing audiences.

Durability is achieved with various material, coating and structural solutions, which also guarantee a long life cycle and good maintainability.

Telescopic systems enable flexibly and quickly transforming multipurpose spaces.

High-quality telescopic systems are designed to meet user needs. Systems are always designed and customized in accordance with the space and the customers' wishes.

Telescopic systems enable the space to be quickly transformed into a multiuse space. The construction of the telescopic platform is faster compared to a cast-in-place structure.

SEAT MECHANISMS

Seat folding mechanisms can be fully automatic, semi-automatic or manual.

Functionality depends on the seat model and the installation method. All products and installation methods do not require a folding mechanism.

FULLY AUTOMATIC FOLDING MECHANISM

→ The seats go automatically down and up according to the movement of the telescope.

SEMI-AUTOMATIC FOLDING MECHANISM

→ The seats fold down automatically as the telescope closes.

→ After opening the telescope, the seats are folded up manually.

MANUAL FOLDING MECHANISM

→ The seats are folded up and down manually.

NOKIA ARENA
Tampere, Finland

We delivered a 13,000-seat seating system to a multi-purpose arena. Fully automatic AP 20 seats with armrests are installed in the telescopic tribunes.

SEAT COLLECTION

In Piironen, high-quality telescopes are used with our own collection of seats

Seat model, color scheme and functionalities can be customized according to space.

The seats can be installed on the rail, on the vertical or horizontal surface of the tribune or freely on the floor.
