PIIROINEN

Sustainability requires actions

We are determined to improve the world we live in.
As a public spaces furniture manufacturer, we strive
for absolutely high quality and sustainable operations.

We are constantly researching new sustainable
materials to use in our products.

Following these principles, we are happy to
introduce our new collections, CARRII and Pi P.

New! New! New!

CARRII

Design F-LAB

I care. You care. We care.

CARRII cares about the environment.
She is made out of recycled PET.

CARRII cares about you. She carries
you and lets you sit comfortably.

CARRII is light and surprisingly
easy to carry around.

CARRII chair is designed especially for lounges and conference rooms.

CARRII is available in four different variations:

- CARRII S1 with standard frame
- CARRII S2 with return mechanism
- CARRII S3 with wheels
- CARRII S4 with return mechanism and wheels

Powder coated metal frame comes in black or white. The 6mm thick cushion is upholstered with Gabriel Focus Melange fabric.

RECYCLED PET

The form pressed seat of the CARRII chair is made of recycled PET.

Öko-Tex 100 certificate is a guarantee that material contains no harmful substances, heavy metals or formaldehyde residues.

Seat has a warm felt-like feeling.

New! New! New!

Pi P

We have expanded the
Pi Collection with Pi P chairs

The seat cup of Pi P is made of
DuraSense® Pure S50 biocomposite
or polyamide with glass fiber (PA+15GF).

Pi P chairs are designed to compete with common plastic chairs.

Pi P is available in five different variations.
Cushion is made of recycled PET.

DURASENSE® PURE S50

Stora Enso's DuraSense contains high amount of renewable fibrous material, giving it several notable advantages:

- Reduced carbon emissions
- Unique tactile feeling
- Natural appearance

Pi P.2
With wooden legs

Pi P.4
With metal legs

Pi P.6
With armrests

Pi P.9
With wheels

Pi P.12
With spider legs
