

PIIROINEN

Pepita

Meet Pepita, our latest addition to the classroom, crafted through a fruitful collaboration between Piironen and design agency Aivan. Derived from the Spanish word for “nugget” or “seed”, Pepita perfectly encapsulates the essence of this school chair. Just like a seed holds the promise of growth, Pepita cultivates a culture of learning in classrooms! Pepita has been meticulously designed to foster an environment of tranquility, serenity, and productivity.

Päivän päätteeksi kun siivotaan, Pepita nostetaan uupottamaan. Pöydän reunalla on sille sopiva, ja näin alta on helppo imuroida!

Design from Finland

Pepita is designed and manufactured in Finland following the principles of sustainable development. Sustainability is one of Piironen's values, and to us, it's important that our products withstand even tough usage.

Pepita chairs are fully serviceable, with all parts replaceable.

Ally of the Cleaner

Lead designer Saku Sysiö's design endeavors were geared towards addressing diverse usage situations, notably the upkeep of tidy spaces. This is achieved by enabling children to conveniently hang their backpacks on the chair's backrest throughout the day. Come day's end, the chairs are lifted and placed on the tabletop, streamlining the cleaning process once the school day winds down.

Ergonomics at the forefront

School days are long, and children often have to sit still for extended periods. That's why the ergonomics of student chairs are particularly important. Pepita is available in two heights and provides a comfortable seating experience.

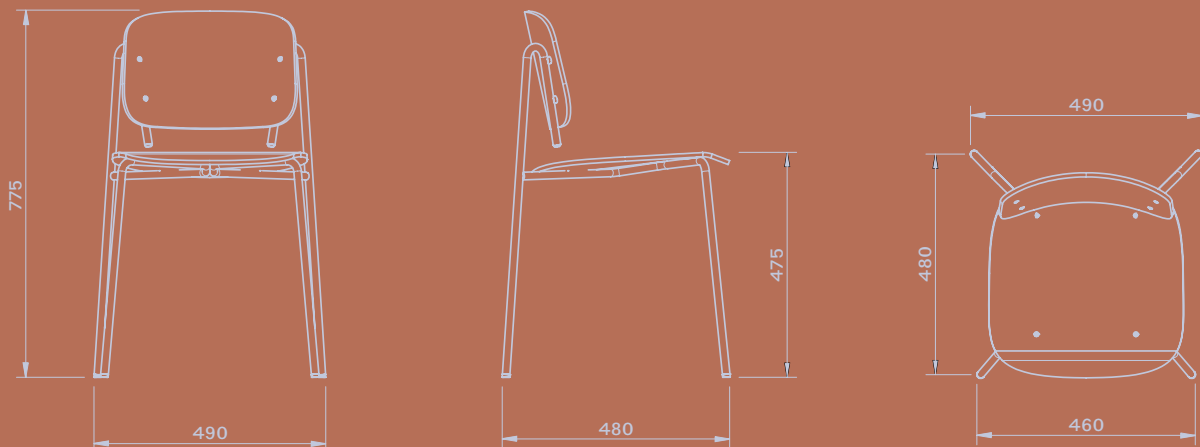

Student chair that cannot tip over

Despite its lightweight structure, Pepita is a sturdy and safe student chair suitable for both the classroom and the cafeteria. The chair is designed so that it cannot tip over.
